# The Introduction of the Nagoya City Next Comprehensive Plan 2018

## How do we use the city strength?

### 1. City of Nagoya and City Planning Policy

- Indicate the city planning policy with the strength of Nagoya

### 2. Focused Strategies

- Focus on the issues expected to have great influence on Nagoya for the next 15 years

## What will be really important in particular?

### 3. The Ideal City Aimed at

- Indicate four images of the ideal city and policies to realize it based on the city planning policy

## What will city hall do?

### 4. Efforts toward Local Government Administration

- Indicate governmental efforts to realize the ideal city

### 5. Toward the Development of the Greater Nagoya Area

- Indicate a vision toward growth of Greater Nagoya as a whole and efforts to realize a new system for the big city

## What kind of city will we aim at?

### 6. Outlines for the Nagoya City Next Comprehensive Plan 2018

- Indicate the position and period
City of Nagoya and City Planning Policy
Indicate the city planning policy through the strength of Nagoya.

Strength of Nagoya

The core of traffic networks
Nagoya is located near the center of Japan and has the railway network, expressways, airport and port. Therefore, it's the core of wide-area traffic networks.

The comfortable living environment
The wide roads and parks are secured, and the comfortable living environment is created. Commuting time is relatively short in spite of a big city, so it's a city satisfied with leisure time. In addition, it's a nice city to live by reason of good water, adequate medical services, convenience of life and superior comfort.

The strong economic power by industry accumulation
The world-class industrial technology of not only vehicles but also airplanes, precision instruments, machine tools and fine ceramics is concentrated, and stable employment is secured under the strong economic power.

The ability of citizens and local government to respond
Citizens and local government can work together to address the issues as we achieved the waste reduction by working with citizens.

City Planning Policy
Use the strength of Nagoya and promote the sustainable city planning which is unique to Nagoya and leads to future.

We are heading for the policy that the future generations can grow up healthy.
We are heading for the policy to have sufficient ability to deal with any disaster.
We are heading for the policy to have sufficient ability to develop further.
We put a top priority on the city planning to be chosen as a living place for the young generation and child-raising households. Meanwhile, we will enhance the vitality of the community by increasing the energetic senior citizens (65+) and planning the system to help each other in the community.

In addition to the city planning to be chosen by child-raising households, we enhance the vitality of the community.

Focused Strategies

- We assume that the demand for medical and welfare services provided by local government and the burden of supporters of the society will increase while the economic vitality will decrease.
- As the family structure has changed behind diverse lifestyles, we assume that support for child-raising households and the senior citizens (65+) will be in high demand.

Issues of Nagoya

- The increasing population will decline.
- The population of senior citizens (65+) will increase.
- The population of those aged 15 to 64 years will decline.

1. Decrease the feeling of anxiety and burden of birth and child care, and promote the comfortable city planning for the young generation and child-raising households. Improve the educational quality and cultivate the human resources for future. Prevent abuse and bullying, and create the environment where children can grow up healthy. Promote the environment planning for the young generation and women to be active.

2. Increase the healthy senior citizens (65+) and extend the healthy life-span. Create opportunities for their activities and increase the support for society.

3. Promote the mutual aid system in the community and prevent child-raising householders, the senior citizens (65+) and the disabled from being isolated. Support the various local organizations to play an active role as the new support for people in need of help.
We prepare for large-scale disasters with the cooperation of citizens, enterprises and government.

Issues of Nagoya

- The rate of earthquakes larger than 8 magnitude within the next 30 years is expected about 70%.
- The measures against disaster prevention, disaster mitigation and early rehabilitation are required.

What happens if a large-scale earthquake occurs?

- The widespread and long-term damage to human, property and economic.
- If the transportation infrastructure is damaged, it has widespread influence on the whole of Japan.
- There is fear of tsunami and liquefaction in the southwest area below sea level.

Focused Strategies

1. Improve the awareness of disaster-prevention through education.
   Promote the collaborative efforts in earthquake disaster countermeasures with citizens, enterprises and others.

2. Improve the systems for evacuation and stockpile in order to conduct evacuation and rescue activities in the event of a disaster.
   Promote the measures for the senior citizens (65+) and the disabled in need of aid and people who have difficulty returning home.

3. Promote the earthquake disaster countermeasures against the urban infrastructure and the disaster operation center related to civic life and economic activities for the early post-disaster rehabilitation.

Focus

It's important to promote the disaster prevention to limit damage from disasters and the disaster mitigation to minimize damage through working together with citizens, enterprises and government.
Promote the attraction of enterprises from home and abroad, support the advancement of function as the headquarters to Nagoya, and attract and cultivate capable human resources.

Promote the industry exchange as downtown of Chubu area and strengthen industrial competitiveness over the whole area.

In the new wide-area traffic network, it’s necessary to aim at the big and strong city with a new role as the backup function of the national capital region in order to develop Nagoya. Therefore, we promote the reinforcement of the cooperation and a wide range of efforts by various organizations.

We make Nagoya the big and strong city to survive against the international interurban competition.

Issues of Nagoya

- The Linear Chuo Shinkansen linking Tokyo and Nagoya is expected to begin in 2027.
- It's necessary to lead the opening of the Linear Chuo Shinkansen to the development of Chubu area.

1. Enhance the traffic network in order to benefit from the opening of the Linear Chuo Shinkansen in Chubu area. As well as increasing the city function of the downtown area near Nagoya station to Sakae, Improve access to transportation.

2. Enhance the attractiveness of the city which makes people want to visit and lead to the vitality of Chubu area.

3. Promote the attraction of enterprises from home and abroad, support the advancement of function as the headquarters to Nagoya, and attract and cultivate capable human resources. Promote the industry exchange as downtown of Chubu area and strengthen industrial competitiveness over the whole area.

Hope

- Reduction of travel time (About 40 min between Tokyo and Nagoya)
- Connections with the national capital region

Fear

“Straw effect” that causes outflow of economic activities and population
