(Descriptions)

- Flood related information illustrated in the map is calculated by simulating immersion areas, flood depth, and flood duration assumed in case of sewer and small and medium-sized river (rivers unexpected to flood in the Flood Hazard Map) floods due to the maximum possible rainfall (156mm/h, 836mm/24h), considering the development status of facilities as of the end of FY2020.
- The simulations consider shutdown of drain pumps and closing of sluice gates associated with river level rise.
- Immersion areas, flood depth, and flood duration are only assumptions and they may largely exceed the assumptions depending on various conditions.
- The map has been created based on the results of simulations conducted by Nagoya City.

This map was created based on the City Planning Basic Map created in 2015 and 2016. A part of the map has been modified after the creation where necessary.

|--|--|
| Designated Emergency Evacuation Site
Where people can temporarily evacuate themselves from disaster risks to protect their lives | Ward boundary |
| Underpass
Where the roads are flooded and closed off in case of heavy rain | School district boundary
School district boundaries are rough estimates. Please contact the ward office for details. |
| Landslide Disaster (Special) Warning Zone
Area where landslide disaster is likely to occur | Designated Emergency Evacuation Site outside the ward |

Evacuation to Designated Emergency Evacuation Site

○ Please evacuate a Designated Emergency Evacuation Site according to the disaster type when you are at risk from disasters (especially when evacuation information (evacuation instructions) is issued) and unable to protect your life, at home.
○ If you voluntarily evacuate regardless of evacuation instructions, please contact the ward office and confirm the evacuation site is safe.
