

To all Persons Performing Construction or Demolition Work

When performing construction or demolition work, the noise vibration and dust of the work can cause problems for residents in the area. For all persons involved in construction or demolition projects, in addition to compliance with laws and ordinances, please consider the following points.

Areas Requiring Special Consideration

★When the work is considered Specified Construction Work, at least 7 days before work begins submit the notification to the pollution control desk at the ward office.

★Explain to people residing near the worksite in advance what work will be performed, the duration, work hours, and measures to prevent noise and vibration.

★Work to reduce the amount of noise, vibration and dust while working and respond rapidly and in good faith to complaints or requests.

※Other precautions

- When planning construction, inspect the local conditions of the worksite and select methods and equipment that will limit sound and vibration to the minimum while take measures against noise and vibration as well as measures to prevent dust.
- When using subcontractors, take measures to ensure they understand the work and to ensure they take noise and vibration measures.
- When operating large vehicles including transport of equipment and soil, sand or gravel, investigate routes and times that will minimize impact on the living environment.
- When using machinery to prepare a holding ground for materials other than the worksite, depending on the local environment, the land use conditions may include environmental conservation ordinances for noise levels.. Take efforts to consider the surrounding environment.
- Excavation involving oozing of ground water may require notification.

To All Prime Contractors of Demolition and Repair Work

Before starting demolition or repair: Obligations under the Air Pollution Control Act:

- ★ Investigate use of asbestos (advance survey). (**This applies to all demolition or repair in principle***)
- ★ Whether or not asbestos is present, the results of the survey must be submitted in writing to the body ordering the work.
- ◆ Areas to describe: ① Day survey completed ② Methods ③ Results
- ★ Results must be posted at the worksite in a **publicly visible location**.

※ This does not apply to demolition or repair of structures that began construction after September 1, 2006, or portions of structures that were modified or repaired after September 1, 2006

Example Notices

レベル1、2(石綿届出対象)

建築物等の解体等の作業に関するお知らせ

□労働安全衛生法第88条第4項(労働安全衛生規則第90条第5号の2)の規定による計画の届出
□石綿障害予防規則第5条第1項の規定による作業の届出
□大気汚染防止法第18条の15第1項の規定による作業実施後の届出
を行っております。
石綿障害予防規則第3条第3項及び大気汚染防止法第18条の17第4項及び同法施行規則第18条の4第1号の規定により、解体等の作業及び建築物の特定じん排出等作業について以下のとおり、お知らせいたします。

事業場の名称: _____

届出先及び届出年月日: _____

作業実施位置: _____

解体等工事期間: _____

特定じん排出等の作業期間: _____

調査方法の概要(調査箇所): _____

調査結果の概要(部分と石綿含有建材の種類): _____

特定じん排出等作業の方法: _____

調査その他の必要事項: _____

レベル3(届出不要)及び石綿未使用

建築物等の解体等の作業に関するお知らせ

大気汚染防止法、労働安全衛生法、石綿障害予防規則及び条例等に基づく調査結果をお知らせします。

事業場の名称: _____

調査終了年月日: _____

届出表示日: _____

解体等工事期間: _____

調査方法の概要(調査箇所): _____

調査結果(部分と石綿含有建材の種類): _____

特定じん排出等作業の方法: _____

調査その他の必要事項: _____

From the website of the Japan Federation of Construction Contractors

When Asbestos is present

- ★Before removal, etc., of specified construction materials (sprayed materials: level 1, thermal insulation: level 2), a specific dust exhaust work notice must be submitted. 14 days before starting work, check with the body ordering the work about submission of the notification to the pollution control desk below.
