

Hazard Map

Kita Ward

duration of flooding Map

 Flooding risk areas including collapse of buildings (In the event of a river flood, houses may collapse or be washed away due to overflowing water or erosion of riverbanks.)

When an evacuation information is emitted, residents living in these areas must evacuate to outer areas instead of going to upper floors.

The shaded areas are outside Nagoya City.

(Descriptions)

- The inundation area as well as the depth and duration of flooding were calculated with the maximum possible rainfall in mind.
- The inundation area as well as the depth and duration of flooding are only assumptions. Flooding may occur at a larger scale depending on a variety of factors.
- This map was created looking into all the areas indicated on the expected inundation area maps published by the Ministry of Land, Infrastructure, Transport and Tourism (MLIT) and Aichi Prefecture. The deeper flooding depth and the longer flooding duration were indicated in areas that overlapped.

Evacuation to Designated Emergency Evacuation Shelter

- Please evacuate to a designated emergency evacuation shelter according to the type of disaster if you are in danger (especially when evacuation information (evacuation instruction, etc.) is released) and you cannot stay at home to save your life.
- Designated emergency evacuation shelters within flooding risk areas including collapse of buildings have been confirmed to be structurally safe.
- Please contact the ward office in advance to confirm the place you are going is safe if you intend to evacuate on your own command.
