Flood depth

- 10.0 m and above
- 5.0 m to less than 10.0 m
- 3.0 m to less than 5.0 m
- 1.0 m to less than 3.0 m
- 0.5 m to less than 1.0 m
- 0.3 m to less than 0.5 m
- Less than 0.3 m

Estimate of water level

(Descriptions)

- Flood related information illustrated in the map is calculated by simulating immersion areas, flood depth, and flood duration assumed in case of sewer and small and medium-sized river (rivers unexpected to flood in the Flood Hazard Map) floods due to the maximum possible rainfall (156mm/h, 836mm/24h), considering the development status of facilities as of the end of FY2020.
- The simulations consider shutdown of drain pumps and closing of sluice gates associated with river level rise.
- Immersion areas, flood depth, and flood duration are only assumptions and they may largely exceed the assumptions depending on various conditions.
- The map has been created based on the results of simulations conducted by Nagoya City.

This map was created based on the City Planning Basic Map created in 2015 and 2016. A part of the map has been modified after the creation where necessary. As for the maps of Tokai City, Oobu City, Toyoake City, Togo-cho, and Nishin City, the City Planning Basic Map is used under the approvals of the municipalities.
