

(Descriptions)

- The flooded areas, flooding depths and durations shown in this map were calculated assuming a storm surge caused by a typhoon (central pressure 910 hPa, radius 75 km, speed 73 km/h) with a pressure equal to typhoon Muroto – the largest typhoon ever to hit Japan, passes along the most critical points in the Mikawa Bay and Ise Bay Coasts.
- The flooded area as well as the depth and duration of flooding are only assumptions. Flooding may occur at a larger scale depending on a variety of factors.
- This map was created based on the storm surge flooding area map published by Aichi Prefecture in June 2021.

Legend	
	Designated Emergency Evacuation Shelter (Areas where you can take shelter from the danger of a flooding disaster in order to save your life.)
	Underpass (Areas where heavy rain will cause roads to be flooded and closed to traffic.)
	Ward boundary
	School district (School districts are approximate. Please contact the respective ward office for information. Information about roads should be requested and checked in advance from the information.)
	Designated Emergency Evacuation Shelter outside the ward

Public Offices (Marked as □)	
	A Naka Ward Office

22	Mosaki Elementary School	17-33 Masaki 1-chome	○
23	Iseiyama Junior High School	2-21 Mosaki 3-chome	○

Evacuation to Designated Emergency Evacuation Shelter

Please evacuate to a designated emergency evacuation shelter according to the type of disaster if you are in danger (especially when evacuation information (evacuation instruction, etc.) is released) and you cannot stay at home to save your life.

Please contact the ward office in advance to confirm the place you are going to stay if you intend to evacuate on your own command.
