

The shaded areas are outside Nagoya City.

(Descriptions)

- The flooded areas, flooding depths and durations shown in this map were calculated assuming a storm surge caused by a typhoon [central pressure 910 hPa, radius 75 km, speed 73 km/h) with a pressure equal to Typhoon Muroto – the largest typhoon ever to hit Japan, passes along the most critical paths in the Mikawa Bay and Ise Bay coast.
- The flooded area as well as the depth and duration of flooding are only assumptions. Flooding may occur at a larger scale depending on a variety of factors.
- This map was created based on the storm surge flooding area map published by Aichi Prefecture in June 2021.

We used the basic urban planning maps used between 2015 and 2016 to create this map. Corrections were made accordingly. We used the urban planning maps at the following places with their consent: Tokai City, Obu City, Toyooka City, Togo Town and Nishin City. [Approval numbers – Tokai City: 3大都321-2, Toyooka City: 豊都180, Togo Town: 東計発42, and Nishin City: 3日都256] Landslide Disaster Hazard Map, Aichi Prefecture, Creative Commons License Attribution 2.1 Japan (<http://creativecommons.org/licenses/by/2.1/jp/>)

○Please evacuate to a designated emergency evacuation shelter according to the type of disaster if you are in danger (especially when evacuation information [evacuation instruction, etc.] is released) and you cannot stay at home to save your life.

○In the event of a high tide, there are designated emergency evacuation sites where evacuation is not possible because the expected flood depth is deeper in some areas than in case of flooding or inundation.

○Please contact the ward office in advance to confirm the place you are going is safe if you intend to evacuate on your own command.
