Evacuation to Designated Emergency Evacuation Shelter

○ Please evacuate to a designated emergency evacuation shelter according to the type of disaster if you are in danger (especially when evacuation information (evacuation instruction, etc.) is released) and you cannot stay at home to save your life.

○ Designated emergency evacuation shelters within flooding risk areas including collapse of buildings have been confirmed to be structurally safe.

○ Please contact the ward office in advance to confirm the place you are going is safe if you intend to evacuate on your own command.

Legend

- 0 **Designated Emergency Evacuation Shelter** — Places where you can take shelter from the danger of a flooding disaster in order to save your life.
- **Underpass** — Areas where heavy rain will cause roads to be flooded and closed to traffic.
- Ward boundary / **School district boundary** — School districts are approximate. Please contact the respective ward office for further information.
- **Designated Emergency Evacuation Shleter outside the ward**

(Descriptions)

- The inundation area as well as the depth and duration of flooding were calculated with the maximum possible rainfall in mind.
- The inundation area as well as the depth and duration of flooding are only assumptions. Flooding may occur at a larger scale depending on a variety of factors.
- This map was created looking into all the areas indicated on the expected inundation area maps published by the Ministry of Land, Infrastructure, Transport and Tourism (MLIT) and Aichi Prefecture. The deeper flooding depth and the longer flooding duration were indicated in areas that overlapped.
