Inland flooding Hazard Map Nakamura Ward

The shaded areas are outside Nagoya City.
(No flood depth given)

Ama City

Oharu-cho

Nakagawa Ward

This map was created based on the City Planning Basic Map created in 2015 and 2016. A part of the map has been modified after the creation where necessary.
As for the maps of Kiyosu City, Ama City, and Oharu-cho, the City Planning Basic Map is used under the approvals of the municipalities. (Approval numbers - Kiyosu City: 3清須第98, Ama City: 3あ都58, Oharu-cho: 3大郡256)

(Descriptions)

- Flood related information illustrated in the map is calculated by simulating immersion areas, flood depth, and flood duration assumed in case of sewer and small and medium-sized river (rivers unexpected to flood in the Flood Hazard Map) floods due to the maximum possible rainfall (156mm/h, 836mm/24h), considering the development status of facilities as of the end of FY2020.
- The simulations consider shutdown of drain pumps and closing of sluice gates associated with river level rise.
- Immersion areas, flood depth, and flood duration are only assumptions and they may largely exceed the assumptions depending on various conditions.
- The map has been created based on the results of simulations conducted by Nagoya City.

Evacuation to Designated Emergency Evacuation Site

○Please evacuate a Designated Emergency Evacuation Site according to the disaster type when you are at risk from disasters (especially when evacuation information (evacuation instructions) is issued) and unable to protect your life, at home.

○If you voluntarily evacuate regardless of evacuation instructions, please contact the ward office and confirm the evacuation site is safe.
