Flood Hazard Map Higashi Ward

Flooding risk areas including collapse of buildings (In the event of a river flood, houses may collapse or be washed away due to overflowing water or erosion of riverbanks.)

When an evacuation information is emitted, residents living in these areas must evacuate to outer areas instead of going to upper floors.

(Descriptions)

- The inundation area as well as the depth and duration of flooding were calculated with the maximum possible rainfall in mind.
- The inundation area as well as the depth and duration of flooding are only assumptions. Flooding may occur at a larger scale depending on a variety of factors.
- This map was created looking into all the areas indicated on the expected inundation area maps published by the Ministry of Land, Infrastructure, Transport and Tourism (MLIT) and Aichi Prefecture. The deeper flooding depth and the longer flooding duration were indicated in areas that overlapped.
