Evacuation to Designated Emergency Evacuation Shelter

OPlease evacuate to a designated emergency evacuation shelter according to the type of disaster if you are in danger (especially when evacuation information (evacuation instruction, etc.) is released) and you cannot stay at home to save your life.

OIn the event of a high tide, there are designated emergency evacuation sites where evacuation is not possible because the expected flood depth is deeper in some areas than in case of flooding or inundation.

OPlease contact the ward office in advance to confirm the place you are going is safe if you intend to evacuate on your own command.
