

Kindergartens

A place for children to learn by playing

Kindergartens are designed to facilitate the healthy growth and development of preschool children. By playing with playground equipment and various natural elements such as sand, water, plants and insects, and interacting with teachers and friends, children naturally get themselves ready for elementary school. Kindergartens also support parents in various ways, for example, by offering safe play spaces for prekindergarten children, opportunities for meeting other parents and advice on parenting issues.

For the locations of kindergartens, please refer to p.28.
